GitHub: <https://github.com/Maheshbabu777>

Email: maheshbabuvishnumolakala@gmail.com

Mobile: + 91 9346624405

SKILLS

Languages:	Java, Python, C++, C
Core Competencies:	Data Structures & Algorithms, Machine Learning, OOP, DBMS, Operating Systems
Tools/Platforms:	VS Code, Git, GitHub, Jupyter Notebook, Figma, HackerRank
Soft Skills:	Problem-Solving, Analytical Thinking, Adaptability, Communication

PROJECTS

Zero- & Few-Shot Multilingual Transformer-Based Language Identification | [GitHub](#) Dec' 25

- Benchmarked multilingual transformers for token-level language identification.
- Recorded **96.68%** accuracy and **0.8816** F1-score on a 7-class code-switching task using mDeBERTa-v3-base.
- Engineered a HuggingFace NLP pipeline with subword label alignment, mixed-precision training, and per-class metrics.
- Assessed zero-shot cross-lingual transfer on Romanized Hindi and hybrid tokens across 4K+ annotated sentences.

Tech Stack: Python, PyTorch, Hugging Face Transformers, Multilingual Transformers

Optimizing EV-Battery Charging with ML Models | [GitHub](#) Mar' 25

- Preprocessed EV charging data by handling missing values, duplicates, and categorical variables efficiently.
- Transformed charging modes, battery types, and EV models into structured ML-ready feature sets.
- Trained and evaluated supervised ML models to optimize EV charging behavior and prediction outputs.
- Achieved **95.33%** model accuracy, validated using held-out test data and confusion-matrix analysis.

Tech Stack: Python, Scikit-Learn, Pandas, NumPy, Matplotlib

Secure Inter-Process Communication (IPC) System | [GitHub](#) Mar' 25

- Designed a secure IPC system in C using Shared Memory and Message Queues for process communication.
- Implemented core IPC operations to support reliable data exchange and synchronization between processes.
- Integrated encryption and decryption logic to ensure confidentiality and integrity of inter-process messages.
- Developed a Tailwind-based HTML and JavaScript UI to visualize real-time message flow between processes.

Tech Stack: C, Linux, Shared Memory, Message Queues, HTML, JavaScript

TRAINING

Machine Learning using Python | [CSE Pathshala](#) Jun' 25 - Aug' 25

- Completed structured training focused on ML algorithms, data preprocessing, and model evaluation.
- Practiced Python, NumPy, Pandas, Matplotlib, Seaborn, and Scikit-Learn through exercises.
- Worked on the Titanic Survival Prediction mini project applying multiple ML models.
- Random Forest gives the highest accuracy of **92%**, outperforming other models.

CERTIFICATES

OCI Generative AI Professional | [Oracle University](#) Oct' 25

Technology Job Simulation | [Forage](#) Aug' 25

Data Structures and Algorithm | [NeoColab](#) Dec' 24

Unrevealing Basic Python towards | [CSE Pathshala](#) Mar' 24

ACHIEVEMENTS

ML Project selected for the India AI summit over 50 groups Jan' 26

Ranked Top 10% in university Nov' 25

EDUCATION

Lovely Professional University Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.98** Aug' 23 - Present

Sri Narayana Junior College Guntur, Andhra Pradesh
Intermediate; **Percentage: 98.2%** Jun' 22 – Apr' 23

Sri Kondaveedu Public School Guntur, Andhra Pradesh
Matriculation; **CGPA: 10.0** Jun' 20 – Apr' 21
